Hightech-Disinfection for water and air

UV-Technik Speziallampen GmbH is going to present UV-components for industrial disinfection purposes at Aquatech Amsterdam 2013

At the most important exhibition for water quality world-wide, the Aquatech Amsterdam, companies from all over the world present their technologies for the water treatment market. Among them the specialist for water and air purification **UV-Technik Speziallampen GmbH**, a company of the international successful Hönle Group. The manufacturer of UV-lamps, electronic ballasts, UV-sensors and other components, located in Wolfsberg/ Germany, offers **trend-setting component solutions for water and air treatment systems** since many years.

At Aquatech, the company will present its wide range of customized products for the air and water treatment market, which can also be used in highly automated production lines. The main focus is concentrated on assemblies in **drinking water, waster water and ballast water installations**.

Besides approved disinfection solutions, the world-wide acting supplier of UV-technology will present sophisticated new developments. Some of them are **electronic power supplies of the DVG- and DS-C-series** with special developed digital control. Such an innovation results in a much more effective supply and an even better operation of UV-lamps.

Another highlight: **explosion-proof sensors according to ATEX-IIB and digital sensors** for monitoring the UV-power and process temperature. Up to 255 sensors can be assembled in a single data bus with tailor-made calibrations. Customization on the highest level!

Moreover, the company will introduce its first **800W UV low pressure lamp**.
