### Innovation: Multi-Lamp-Controller MLC-Rack

**UV-Technik Speziallampen GmbH launches Multi-Lamp-Controller**

UV-Technik Speziallampen GmbH is introducing a new **Multi-Lamp-Controller** (Electronic Power Supply) for UVC-low-pressure-lamps. The Multi-Lamp-Controller has the ability to control up to 30 lamps with a maximum lamp power of 1,000W.

This power supply is made for technical water and air treatment systems, e.g. for drinking and process water applications as well as for ballast water treatment systems.

During the design of huge installations, the wiring effort and footprint of switch cabinets play an important role. Due to its **modular design and pluggable connectors**, the new developed MLC-Rack offers a the **most compact system control** at minimal installation efforts.

The **digital control** allows the exact power adjustment and precise monitoring of all connected lamps per **integral Ethernet-interface**. In addition, multi-colored LEDs signalize the operation status of each UV-lamp.

Thanks to the **integral PFC-stage** and the **low THDI-value of < 5%** the MLC-Rack complies with current and potential future requirements. A most efficient system operation is guaranteed thereby.

For questions please do not hesitate to contact us again.

**About UV-Technik Speziallampen GmbH:** The company is expert for customized UV-components since 1991. From UV- and IR-lamps via electronic ballasts up to UV-sensors, UV-Technik Speziallampen GmbH offers a wide range of innovative products. The R&D department as well as production facilities and sales department are located in Wolfsberg/Germany.

**About the Hönle Group:** In addition to the original parent company, UV systems specialist Dr. Hönle AG, the Hönle Group also comprises of the sheet-offset specialists Eltosch Grafix (UV/IR/hotair dryers and peripheral units, e.g. ink fixation) and the UV specialist for rotary printing PrintConcept. Experts in the division glass and lamp manufacturing are Raesch (customized quartz glass components), UV-Technik Speziallampen (lamp manufacturing, e.g. for disinfection) and Aladin (UV lamp manufacturing). Further subsidiaries are the specialist for professional lightning technology Mitronic as well as the adhesives specialist Panacol.

The German based Hönle Group has local subsidiaries in China, France, Spain and the USA as well as sales offices in Italy and the Netherlands. The Hönle Group has also got an extensive worldwide network of experienced sales and service partners.
